

Assignment: Bootstrap UI Components.

Objective:

To design and implement real-world website interfaces using Bootstrap components such as **Cards, Badges, Pagination, Progress Bars, Spinners, Tables, Breadcrumbs, and Grids**. Each task focuses on **design thinking, component usage, and Bootstrap class application**.

◆ 1) Cards

Description:

Cards are commonly used to display **products, profiles, services, or articles** on websites.

Questions:

- 1. Product Showcase Card**
 - Create a responsive product card showing an image, title, description, and price.
 - Add a footer with “Buy Now” and “Add to Wishlist” buttons.
 - 2. Team Member Profile Card**
 - Design a card showing an employee photo, name, designation, and LinkedIn button.
 - Use `.card-img-top`, `.card-body`, and `.card-footer` classes.
 - 3. Blog Post Card**
 - Create a card displaying a blog thumbnail, title, a few lines of text, and a “Read More” button.
 - 4. Testimonial Card**
 - Build a card to show customer reviews with `.card-subtitle` for company name and `.card-text` for feedback.
 - 5. Offer/Discount Card**
 - Display a promotional offer card with an image overlay (`.card-img-overlay`) and a “Shop Now” button.
-

◆ 2) Badges

□ Description:

Badges are used to display **notifications, counts, or highlights** (like message count, unread notifications, etc.)

□ Questions:

1. **Notification Bell Badge**
 - Create a bell icon button with a badge showing unread notifications (e.g., “5”).
 2. **Shopping Cart Badge**
 - Design a “Cart” button showing number of items in cart dynamically using a badge.
 3. **Category Highlight Badge**
 - Display different product categories using badges (`.bg-success`, `.bg-warning`, `.bg-danger`).
 4. **Status Badge**
 - Use badges to show order statuses: “Delivered”, “Pending”, “Cancelled”.
 5. **Profile Level Badge**
 - On a user profile, show membership level badge like “Gold Member”, “Platinum Member”.
-

◆ 3) Pagination

Description:

Pagination helps in navigating through **multiple pages of content** like blogs, product lists, or records.

Questions:

1. **E-commerce Product Pages**
 - Design pagination for a product catalog with 10 pages and indicate the current page using `.active`.
2. **Blog Navigation**
 - Create pagination showing previous (`«`) and next (`»`) navigation links.
3. **Disabled Page Example**
 - Add a disabled state (`.disabled`) for unavailable pages.
4. **Centered Pagination**
 - Display pagination in the center of the page for a news listing site.
5. **Dark Theme Pagination**
 - Create pagination styled for a dark-themed dashboard using contextual color classes.

◆ 4) Progress Bar

Description:

Progress bars visualize **task completion**, **file uploads**, or **goal tracking**.

Questions:

1. **File Upload Progress**
 - Show upload progress (e.g., 60%) using `.progress-bar-striped` and `.progress-bar-animated`.
 2. **Task Completion Tracker**
 - Create a progress bar showing task completion in a project management app.
 3. **Multi-colored Progress**
 - Display multiple progress bars in one line to represent different tasks' completion status.
 4. **Goal Achievement Bar**
 - Visualize "Donation Goal" progress with contextual colors for achieved, pending, and remaining.
 5. **Quiz Completion**
 - Create a progress bar that shows a student's quiz progress (e.g., 80% done).
-

◆ 5) Spinners

Description:

Spinners are used to indicate **loading**, **processing**, or **waiting** states.

Questions:

1. **Page Loading Spinner**
 - Add a spinner in the center of a webpage indicating "Loading content..."
 2. **Button Loading State**
 - Show a button with a small spinner (`.spinner-border-sm`) while submitting a form.
 3. **Login Processing Spinner**
 - Create a spinner with text "Authenticating..." below the login form.
 4. **Image Upload Spinner**
 - Display a spinner while image upload is in progress using `.spinner-grow`.
 5. **Data Fetching Spinner**
 - Simulate data fetching in a dashboard with `.spinner-border` and `.text-warning`.
-

◆ 6) Tables

Description:

Bootstrap tables are used to display **data-rich information** like product lists, students' marks, etc.

Questions:

1. **Student Result Table**
 - Create a table displaying student names, marks, and grade.
 - Use `.table-striped` and `.table-bordered`.
 2. **Product Inventory Table**
 - Display a product stock table using `.table-hover` and `.table-success`.
 3. **Responsive Table**
 - Create a wide table (15+ columns) and make it responsive with `.table-responsive`.
 4. **Dark Themed Table**
 - Use `.table-dark` to create a dark mode styled data table.
 5. **Sales Report Table**
 - Display monthly sales with a caption on top (`.caption-top`) and highlight high-performing products.
-

◆ 7) Breadcrumb

Description:

Breadcrumbs show **navigation hierarchy** or **user journey** (like Home → Category → Product).

Questions:

1. **E-commerce Navigation Path**
 - Display breadcrumb path: *Home → Electronics → Mobiles → iPhone 15 Pro*.
2. **Education Portal**
 - Create breadcrumb: *Dashboard → Courses → Web Development → Bootstrap 6 → Assignment 1*.
3. **News Website**
 - Create breadcrumb navigation for categories: *Home → World → Asia → India*.
4. **Online Food Delivery**
 - Show breadcrumb steps: *Home → Restaurants → Pizza Hut → Checkout*.
5. **Job Application Flow**
 - Show user's progress: *Dashboard → My Applications → Status → Interview Round*.

◆ 8) Grid System

Description:

Bootstrap Grid helps in structuring **layouts**, dividing a page into responsive columns (max 12 per row).

Questions:

1. **3-Column Footer Layout**
 - Create a footer using `.row` and `.col` to display three equal sections (About Us, Services, Contact).
2. **Dashboard Layout**
 - Design a layout with Sidebar (3 columns), Main Content (6 columns), and Ads (3 columns).
3. **Product Gallery Grid**
 - Display a responsive 4-column grid of product cards using `.col-3` and `.row`.
4. **Profile Page Layout**
 - Create a layout: Sidebar (col-3), Profile Info (col-6), Friends List (col-3).
5. **Header + Content + Footer Layout**
 - Use grid to design a simple webpage structure with a header, two-column body, and footer.

HTML CODE FORMAT :

```
<!DOCTYPE html>

<html lang="en">
