Part B – Descriptive Problem Statement (30 Marks).

Problem Statement:

Create a **one-page landing website** for a fictional company of your choice — it could be a **tech startup, travel agency, fashion brand, or fitness center**.

Use Bootstrap 5 to design every section with proper structure, responsive grids, and attractive components.

Your website should look like a **real business homepage** — something that can impress a client or employer in your portfolio.

Design & Functional Requirements:

1. Navigation Bar (Navbar)

- Display your company's **logo or name** on the left.
- Include navigation links like **Home, About, Services, and Contact**.
- Make it responsive using a **hamburger menu (navbar-toggler)** for mobile screens.
- Use Bootstrap icons or dropdowns if needed.

2. Hero / Carousel Section

- Add a **carousel** with **at least 3 sliding images** and **captions** describing your brand or products.
- Use `.carousel`, `.carousel-inner`, `.carousel-item`, and navigation controls for smooth transitions.

3. About Section

- Create a visually rich **About Us** section using `.container-fluid` and the **grid system** (`.row`, `.col`).
- Describe your brand's **mission, values, or vision** using Bootstrap text utilities like `.text-center`, `.fw-bold`, and `.bg-light`.

4. Services / Products Section

- Use **Bootstrap cards** to present at least **3 services or products**.
- Each card must include:
 - An image (`.card-img-top`)
 - Title & description (`.card-header`, `.card-body`)
 - A button (e.g., *Learn More*, *Buy Now*, *Add to Cart*)

5. Newsletter / Contact Form

- Design a **contact or subscription form** using `.form-control` and `.form-label`.
- Include input fields for **Name**, **Email**, and **Message** or **Subscribe button**.
- Add a submit button styled with `.btn` and a contextual color (like `.btn-primary`).

6. Alert Message

- After form submission (you can simulate it), show a **Bootstrap alert box** like
“✓ Form Submitted Successfully!”
- Make it dismissible using `data-bs-dismiss="alert"` and `.alert-dismissible`.

7. Modal (Login / Register)

- Create a **Login or Register modal** that appears when a user clicks a button in the navbar or footer.
- Use `.modal`, `.modal-dialog`, `.modal-content`, and `.modal-footer` for structure.

? 8. FAQ Section with Accordion

- Use the **accordion component** to display at least **3 frequently asked questions**.
- Apply `.accordion`, `.accordion-item`, `.accordion-header`, and `.accordion-body` classes.
- Ensure only one question expands at a time using `data-bs-parent`.

by **Kunal Sir**

9. Spinner or Progress Bar

- Show a **progress bar** or **spinner** representing loading, registration progress, or service completion.
- You can place it near the footer or as part of the contact section.

10. Footer Section

- Include a **footer bar** with your company's name, copyright, and social media icons using **Bootstrap Icons** (e.g., Facebook, Instagram, Twitter).
- Center it using `.text-center` and `.bg-dark .text-white`.

Bonus Creativity (Optional for Extra Marks ★):

- Add **Hover Effects** using Bootstrap utility classes.
- Use **offcanvas navigation** for mobile screens.
- Include a **scroll-to-top button** using Bootstrap icons.
- Add a **responsive background image** in the hero section.

Deliverables:

- File Name: `landingpage.html`
- Framework: **Bootstrap 5 (via CDN links)**
- The final design must be:
 - **Fully responsive** (works on mobile, tablet, and desktop).
 - **Well-structured and visually balanced.**
 - **Using multiple Bootstrap components** effectively.
