by Kunal Sir

Array Tasks:

Q1) Solve the below program with POJO

```
public class Hospital {  
    name  
    location  
    mobno  
    noOfDoctors  
}
```

```
public class Doctor {  
    name  
    address  
    mobno  
    fees  
}
```

```
public class Patient {  
    name  
    address  
    mobno
```

disease

bloodGroup

}

public class Info{

public Hospital[] hospData()

public Doctor[] docData()

public Patient[] patData()

// set data for 3 objects method

//Store in array and get data by using

for loop

}

public class Test{

main(){

//Access all data

}

}

Q2) Solve with Direct Access and with POJO

```
public class Manager{
```

```
    id
```

```
    name
```

```
    mobno
```

```
    address
```

```
    salary
```

```
    Customer custom
```

```
}
```

```
public class Bank{
```

```
    name
```

```
    branch
```

```
    noOfBranches
```

```
    location
```

```
    mobno
```

```
    Manager man
```

```
}
```

```
public class Customer{
```

by Kunal Sir

```
name  
adhaar  
panNo  
mobno  
address  
accType  
}
```

```
public class Details{  
    //set all Data in setdata method for 3 Objects of each class  
    //Store in array  
    //get all data in getdata method  
}
```

```
public class Test{  
    main(){  
        //Access all data  
    }  
}
```

Q3) Solve the below program with POJO

```
public class Company{
```

```
    id
```

```
    name
```

```
    address
```

```
    mailId
```

```
    product
```

```
    Manager man
```

```
}
```

```
public class Manager{
```

```
    id
```

```
    name
```

```
    address
```

```
    salary
```

```
    mobno
```

```
    department
```

```
    Employee emp
```

```
}
```

by Kunal Sir

```
public class Employee{  
    id  
    name  
    address  
    salary  
    mobno  
    designation  
}
```

```
public class Setdata{  
    // set all data for 3 objects  
    //store in Array  
}
```

```
public class Getdata{  
    //get all data  
}
```

```
public class Test{  
    main(){  
        //Access all data } }
```
