

COMPARABLE TASK: -

List of tasks related to Comparable–

Question 1. What is comparable and why we are using comparable?

Question 2. What is the difference between Comparable and Comparator?

Question 3. What is comparator and why we are using comparator?

Question 4. Write the program to sort Customer class object by using natural sorting.

i) Sort by id

ii) Sort by name

iii) Sort by mobile no

public class Customer

{

CJC
Complete Java Classes

```
int cid;  
String cname;  
long mobno;  
//Object & Constructor  
}
```

public class Test

```
{  
public static void main(String[] args)  
{  
//  
}  
}
```

Question 5. Write the program to sort class object by using natural sorting.

i) Sort by id

ii) Sort by name

iii) Sort by mobile no

CJC
Complete Java Classes

Person.java

```
{  
    private String pname;  
    private String paddr;  
    private long pmob;  
}
```

Account.java

```
{  
    private int accno;  
    private String acctype;  
    private Person p;  
}
```

Bank.java

```
{  
    private String bname;  
    private String branch;  
    private String addr;  
    private Account acc;
```

CJC
Complete Java Classes

```
}
```

public class Test

```
{  
    public.....getDetails(.....)  
    {  
        //get the data using iterator/ for loop  
    }  
    public.....setDetails()  
    {  
        //set the data and add in set  
    }  
  
    main()  
    {  
        //call the methods here  
    }  
}
```

Question 6. Solve with using Constructor, Object through and Setter Getter.

Class Patient having int id, String name, String disease.

Class Test having main method //Store multiple Patients data by using loop and Set values with Scanner and iterate by using enhance for loop and iterator.

Question 7. Solve with using Constructor, Object through and Setter Getter.

Class Hospital having String name, String location, Doctor dr.

Class Patient having int id, String name, String disease.

Class Doctor having String name, String address, int fees, Patient pat.

Class Test having main method //Store multiple data by using loop and Set values with Scanner and iterate by using enhance for loop and iterator.

THANK YOU
