

COMPARATOR TASK: -

List of tasks related to Comparator–

Question 1. Write the program to sort Company class object by using Custom sorting.

i) Sort by id

ii) Sort by name

iii) Sort by mobile no

public class Company

{

int cid;

String cname;

long cmobno;

//Object , Constructor & Setter and Getter

}

public class Test

{

CJC
Complete Java Classes

```
public static void main(String[] args)
{
    //
}
}
```

Question 2. Write the program to sort object by using custom sorting.

i) Sort by id

ii) Sort by name

iii) Sort by mobile no

Person.java

```
{
    private String pname;
    private String paddr;
    private long pmob;
}
```

Account.java

```
{
```

CJC
Complete Java Classes

```
private int accno;  
private String acctype;  
private Person p;  
}
```

Bank.java

```
{  
    private String bname;  
    private String branch;  
    private String addr;  
    private Account acc;  
}
```

public class Test

```
{  
    public.....getDetails(.....)  
    {  
        //get the data using iterator/ for loop  
    }  
}
```

CJC
Complete Java Classes

```
public.....setDetails()  
{  
    //set the data and add in set  
}
```

```
main()  
{  
    //call the methods here  
}
```

Question 3. Solve with using Constructor, Object through and Setter Getter.

Class University having int uid, String unname, String ulocation.

Class Test having main method //Store multiple University data by using loop and Set values with Scanner and iterate by using enhance for loop and iterator and also use custom sorting here.

Question 4. Solve with using Constructor, Object through and Setter Getter.

CJC
Complete Java Classes

Class Hospital having String name, String location, Doctor dr.

Class Patient having int id, String name, String disease.

Class Doctor having String name, String address, int fees,
Patient pat.

Class Test having main method //Store multiple data by using
loop and Set values with Scanner and iterate by using enhance
for loop and iterator and also use custom sorting here.

THANK YOU
