Q 1: Voting Eligibility Check App

Write a program that checks if a person is eligible to vote based on age. The program should ask the person their age and print an appropriate message.

- **Requirements:**

1. If the person is 18 or older, print "You are eligible to vote."
2. If the person is younger than 18, print "You are not eligible to vote."
3. If the person enters a non-numeric value, print "Invalid input. Please enter a valid age."
4. If the person enters a negative number, print "Invalid input. Please enter a valid age"

Sample Input/Output:

Enter Valid Age [18 or older]

Input : Please enter your age: 20

Output : You are eligible to vote.

Enter Valid Age (younger than 18)

Input : Please enter your age: 14

Output : You are not eligible to vote.

Enter Invalid Input (non-numeric)

Input : Please enter your age: abc

Output : Invalid input. Please enter a valid age.

Enter Invalid Input (negative number)

Input : Please enter your age: -7

Output : Invalid input. Please enter a valid age.
