MAP TASK: -

List of tasks related to Map interface—

Question 1. What is Map in java. Draw the hierarchy of Map?

Question 2. Write the Map program, add this key and value into the map and retrieve using iterator and for each loop (with and without generics).

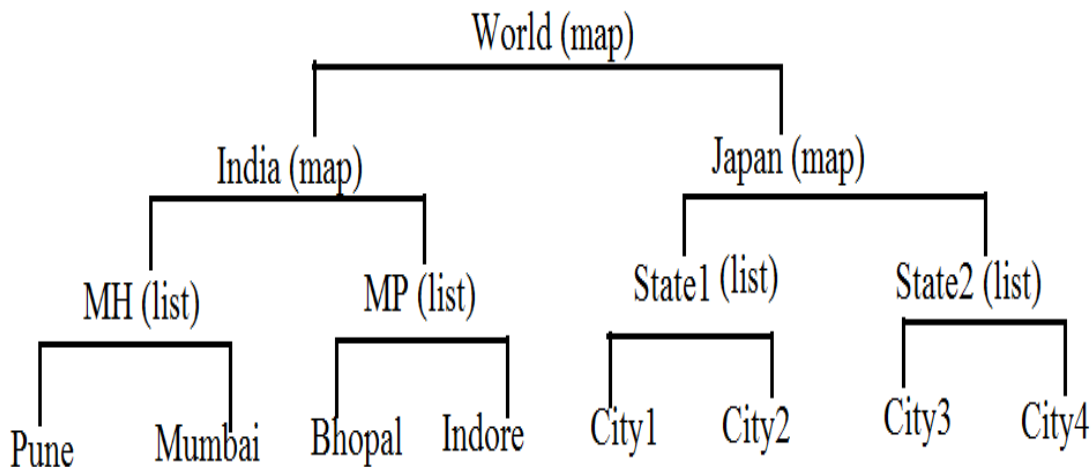

```
{ a = abc, b = pqr, c = xyz }
```

Question 3. Write the Map program, add this key and value pairs into the map and retrieve using iterator and for each loop (with and without generics)

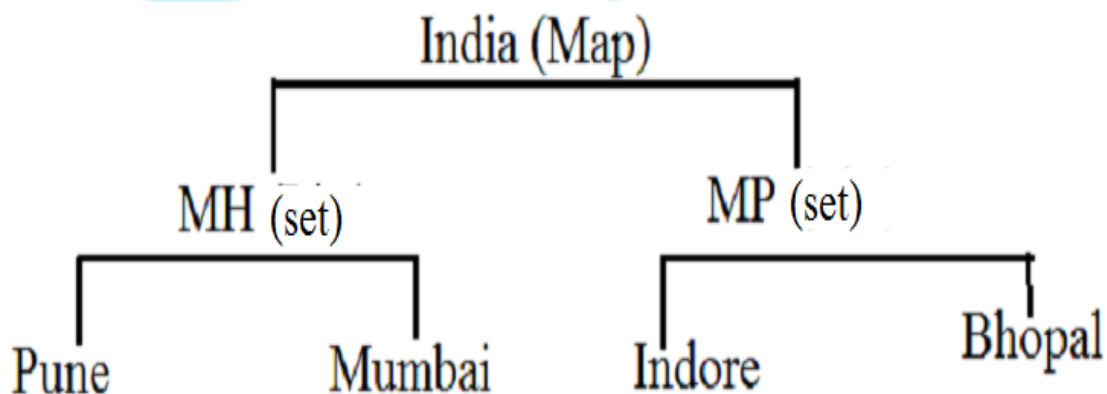

```
{ 1 = abc, 2 = pqr, 3 = xyz }
```

Question 4. Write the Map of Map of List of String program.

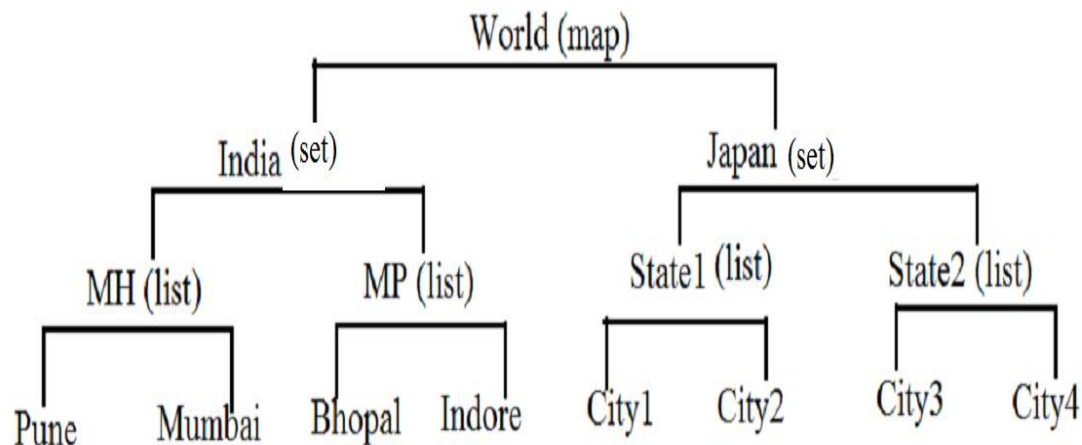

Question 5. Write the Map of Set of String program.

Question 6. Write the Map of Set of List of String program.

Question 7. Write the program for Map of Student

- i) Without generic
- ii) With generic using iterator
- iii) With generic using for each loop

```
public class Student  
{  
    priavte int rollno;  
    private String name;
```

CJC

Complete Java Classes

```
//setter and getter
```

```
}
```

```
public class college
```

```
{
```

```
    public.....m1()
```

```
    {
```

```
        //set all student data and add it into the map here
```

```
        Map eng=new HashMap();
```

```
        Student s=new Student();
```

```
    }
```

```
    public static void main(String args[])
```

```
    {
```

```
        //get all student data using iterator and for each loop here
```

```
    }
```

```
}
```

Question 8. Write the collection program for Map of Employee.

CJC

Complete Java Classes

- i) Without generic
- ii) With generic using iterator
- iii) With generic using for each loop

public class Employee

```
{  
    priavte int eid;  
    private String ename;  
    private double esalary;  
    //setter and getter  
}
```

public class company

```
{  
    public ..... designation()  
    {  
        //set all employee data and add it into the map here  
        Map team=new HashMap();  
    }  
}
```

CJC

Complete Java Classes

```
public static void main(String args[])
{
    //get all employee data using iterator and for each loop here
}

}
```

Question 9. Write the program for Map of List of Student

i) Without generic

ii) With generic using iterator

iii) With generic using for each loop

```
public class Student {
    private int rollno;
    private String name;
    //setter and getter
}
```

```
public class college
{
```

CJC

Complete Java Classes

```
public ..... m1()
{
//set all student data and add it into the list and then map here
    Map eng=new HashMap();
    List fe=new ArrayList();
    Student s=new Student();

    Student s1=new Student();

    List se=new ArrayList();
    Student s2=new Student();

    Student s3=new Student();
}

public static void main(String args[]){
    //get all student data using iterator and for each loop here
}
}
```

Question 10. Write the collection program for Map of Map of Employee.

i) Without generic

ii) With generic using iterator

iii) With generic using for each loop

public class Employee

```
{  
    priavte int eid;  
  
    private String ename;  
    private double esalary;  
    //setter and getter  
}
```

public class company

```
{  
    public ..... designation()  
    {  
        //set all Employee data and add it into the map here
```

CJC
Complete Java Classes

```
Map team=new HashMap();
```

```
Map developer=new HashMap();
```

```
Employee e=new Employee();
```

```
Employee e1=new Employee();
```

```
Map tester=new HashMap();
```

```
Employee e2=new Employee();
```

```
Employee e3=new Employee();
```

```
}
```

```
public static void main(String args[])
```

```
{
```

```
//get all employee data using iterator and for each loop here
```

```
}
```

```
}
```

THANK YOU
