(if number is 0 print exception msg as "Zero input number")

```
public class ZeroInputException
```

```
{  
  
}
```

```
public class Number
```

```
{
```

```
    public void getNumber(int i) {
```

```
        //Write the custom exception here.
```

```
    }
```

```
}
```

```
public class TestN
```

```
{
```

```
    public static void main(String[] args){
```

```
        Number num = new Number();
```

```
        //Handle exception and print exception msg here
```

```
        num.getNumber(0);
```

```
    }
```

```
}
```
